SUMMARY

Senior Full Stack Mobile Developer and Team Lead with 3.5+ years building cross-platform iOS and Android apps in Flutter, plus native iOS in SwiftUI. Shipped 5 live production apps and supported 6+ more across product and service companies, led a team of 3–4 engineers at Octet Solutions, and owned end-to-end delivery of OneVision and NaskoChina. Strong in clean architecture, Firebase, RESTful APIs and Socket.IO real-time on both Flutter and iOS, OpenAI chatbots, payments, and Node.js / Express / MongoDB backends.

EXPERIENCE

Senior Flutter Developer & Team Lead · Octet Solutions, Lahore — Jan 2025 – Aug 2026

- Led a team of 3–4 Flutter developers: code reviews, sprint planning and day-to-day technical mentoring.
- Owned the product lifecycle: requirements, architecture (Clean, MVVM), release and post-launch iteration.
- Primary client contact, translated business requirements into scalable technical plans.
- Built location tracking and geofenced clock-in for **OneVision** (Google Maps SDK), live on both stores.
- Added an **OpenAI** in-app assistant (Assistants API) and GPT chat with image generation to NaskoChina's Node.js backend.
- Published **easy_support_flutter**, an open-source support-chat SDK on pub.dev.

Flutter Developer · Sparkle Solutions — 2024 – 2025

- Built and shipped the Sparkle app end-to-end on REST APIs within tight project timelines.

Flutter Developer · Finjineers — 2024

- Shipped **Instructor Connect** to Google Play and the App Store with Firebase, REST APIs and push notifications.
- Front-end work on Blood-bud, Tada, Guava, GoViral and Agora video-calling apps with reusable components.

Flutter Developer · Nasko Enterprise — 2023 – 2024

- Led **NaskoChina**, a B2B trade platform with real-time chat and a multi-currency wallet, to its Google Play release.
- Migrated messaging from Firestore listeners to a Socket.IO backend with a JWT-authenticated handshake (1:1 and group chat, reactions, read receipts).
- Built wallet top-ups with Stripe and Google Pay, QR send/receive and deep-link routing.

Flutter Developer Intern · Finjineers, Lahore — 2022

- Contributed to live client projects while building practical, production Flutter skills.

LIVE PRODUCTION APPS

NaskoChina — B2B trade, chat & wallet (lead)
Flutter · GetX · Socket.IO · Node.js · Stripe · Google Play

OneVision — workforce scheduling & timecards (lead)
Flutter · Maps SDK · Geofencing · Firebase · Google Play · App Store

Advo Health — telehealth video consultations
Flutter · WebRTC · RevenueCat · Play Billing · Firebase

Instructor Connect — driving-lesson booking (UK)
Flutter · Firebase · REST · FCM · App Store

The Fire Book — employee shift scheduling
Flutter · Firebase · REST · FCM

easy_support_flutter — open-source support SDK
Dart · WebSockets · Socket.IO · Dio · pub.dev

TECHNICAL SKILLS

Mobile	Flutter, Dart, Android, iOS, SwiftUI & Swift (REST via URLSession, Socket.IO), Google Maps SDK, geofencing, deep links, push notifications, in-app subscriptions
Architecture & State	Clean Architecture, MVVM, MVC, Repository pattern, GetX, BLoC, Provider, dependency injection
Backend & Payments	Node.js, Express, MongoDB (Mongoose), REST, WebSockets, Socket.IO, WebRTC, Agora RTC, Dio · Stripe, Google Pay, RevenueCat, Play Billing
Firebase & Data	Auth, Firestore, Realtime DB, Cloud Functions, FCM, Crashlytics, ObjectBox, Hive, SQLite
AI & Chatbots	OpenAI API (Assistants threads & runs, GPT chat, image generation), structured JSON outputs, support bots with live-agent handoff
Tooling	Git (GitHub, GitLab), Docker, CI/CD, Play Console, App Store Connect, unit & widget testing

EDUCATION

BSc Computer Science — Superior University, Lahore · 2018 – 2024
Professional Flutter Development — Corvit Systems, Lahore

ADDITIONAL

Languages: English (fluent), Urdu (native)
Work: Remote worldwide or on-site in Lahore
